

To Whom It May Concern

Subject: Certificate of Research Experience & Internship – Mr. Gannoju Pavan Kumar

This letter certifies that Mr. Gannoju Pavan Kumar was associated with Prodigal AI Technologies Pvt. Ltd. from 26 March 2025 to 30 November 2025.

During this period, he formally held the position of AI Intern. However, owing to his exceptional technical competence and demonstrated research maturity, he was additionally entrusted with the responsibilities of Research Team Lead for a specialized R&D unit focused on Generative AI Security and Trustworthy AI Systems.

Mr. Pavan played a pivotal role in shaping our engineering and research roadmap. His responsibilities included defining technical research protocols, conducting empirical benchmarking, coordinating team-wide experimentation, and managing the complete end-to-end research publication workflow.

His contributions were primarily centered around the following advanced research initiatives:

1. Generative Audio & Model Expressivity

Paper Title: "Guided Multi-Modal Sampling: A White-Box Input Protocol for Enhancing Expressivity in Zero-Shot Voice Cloning with Mixture-of-Experts"

Contribution: Mr. Pavan led the architectural design of a white-box input control protocol leveraging Mixture-of-Experts (MoE) architectures. His work involved extensive experimental evaluation aimed at enhancing expressivity in zero-shot voice synthesis while preserving signal fidelity and output stability.

2. AI Security & Adversarial Robustness

Paper Title: "AI Tamper-Proofing and Data Integrity: A Comprehensive Framework for Defense Against Adversarial Attacks"

Contribution: He engineered a comprehensive defense-in-depth framework for detecting and mitigating prompt injection, data poisoning, and adversarial manipulation in Large Language Models (LLMs). This research directly supports our initiatives in developing secure, safety-aligned, and governance-aware AI systems.

Throughout his tenure, Mr. Pavan demonstrated a rare blend of strong theoretical grounding in deep learning and AI alignment, coupled with excellent applied engineering capabilities. As Research Team Lead, he effectively coordinated research activities, enforced modular and maintainable code practices, and upheld rigorous standards for documentation and experimental reproducibility.

We strongly recommend Mr. Gannaju Pavan Kumar for graduate studies. His ability to bridge advanced AI research with secure system implementation makes him an outstanding candidate for research-intensive academic programs.
